

Prevailing Over Recurrent Pregnancy Loss

a free, public seminar

Thursday, October 28, 2010

6:30 pm – 8:00 pm

Arrillaga Alumni Center

326 Galvez Street, Stanford University Campus

Ruth Lathi, MD, Assistant Professor of Obstetrics & Gynecology, Division of Reproductive Endocrinology & Infertility, and director of Stanford's Recurrent Pregnancy Loss (RPL) program, will lead a faculty group presentation on the diagnosis and treatment of women experiencing recurrent miscarriage.

This seminar represents the most current research and clinical knowledge about RPL, including treatment options. Guests will come away with an understanding of the unique — and common — factors impacting miscarriage, and most importantly, appreciate that no matter how challenging the journey, the majority of patients prevail over RPL, realizing their dream of a successful pregnancy. Also, meet **Penny Donnelly, RN, LMFT**, RPL Patient Liaison, and Nurse Counselor.

**Penny Donnelly,
RN, LMFT**

Other Stanford faculty scheduled to speak and answer audience questions at this seminar include:

**Christy Dosiou,
MD, MS**, Clinical Assistant Professor of Medicine, Division of

Endocrinology, will discuss the association between thyroid dysfunction and pregnancy loss.

**Joanne Taylor,
MS, CGC**, Genetic Counseling Supervisor, Lucile Packard Children's Hospital

will discuss the role of genetic testing capabilities before, during and after pregnancy.

Jane Chueh, MD, Clinical Professor in the Division of Maternal Fetal Medicine, will review

2nd trimester pregnancy issues, while touching on some prenatal diagnostic testing capabilities.

**Katherine Williams,
MD**, Clinical Associate Professor of Psychiatry & Behavioral Sciences, will look

at the role of anxiety and depression in recurrent miscarriage.

To reserve seats at this free seminar,
please contact Ms. Donnelly at pdonnelly@stanfordmed.org, or phone (650) 723-6408.
